

SUPAVAC

Mobile Vacuum Solids Pumps

Guzzla - SV 60

The **SV 60** is a one man operated vacuum recovery pressure discharge unit that will transfer almost any flowable material.

Used in:

Municipal, Mining, Marine, Petro-chemical & Agricultural Industries.

- Compressed air operated creating over 55cm HG vacuum using 4.2m³ /min @ 5.8 bar (150cfm@85psi)
- Delivers up to 500 metres
- Recovers up to 50 metres
- Fully automatic with no moving parts in contact with the material pumped
- Pumps up to 10m³ / hour +

Applications

- Sump cleaning
- Drain desilting
- Mining slurries
- Drill cuttings and OBM transfer
- Settling pond / sewage filter media
- Agricultural waste / sugar and grain
- Hazardous waste transfer
- Pneumatic Excavation

SV 110 - Glutt'n

The **SV 110** is a highly mobile air powered vacuum unit designed for the rapid recovery and transfer of heavily solids laden slurry. Designed to work in some of the worlds most arduous environments with low maintenance this Supavac has the ability to transfer material in excess of 80% solids and high SG on a 24/7 basis. The SV 110-V features an exceptionally efficient venturi delivering in excess of 25" hg with powerful airflows and almost no wearing parts, the new SV 110-V truly is a GLUTT'N for punishment.

- 100mm (4") Load and Discharge capabilities
- Full 25" hg of vacuum with strong airflow
- Intrinsically safe
- Highly mobile
- Recover and transfer up to 18000 LPH (4500GPH)
- Requires 25mm (1") ID Supply Air Hose
- Air consumption 230-280 CFM at 85PSI+

SV 300

The **SV 300** is a one man operated vacuum recovery pressure discharge unit that will transfer almost any flowable material.

Used in:

Municipal, Mining, Marine, Petro-chemical & Agricultural Industries.

- Compressed air operated creating over 25" HG vacuum using 600 cfm @ 85 psi minimum.
- Delivers up to 3000 feet (1000 metres).
- Recovers up to 240 feet (80 metres).
- Fully automatic with no moving parts in contact with the material pumped.
- Pumps up to 26 yards³ (20m³/hour) +.

Applications

- Sump cleaning
- Drain desilting
- Mining slurries
- Drill cuttings and OBM transfer
- Settling pond / sewage filter media
- Agricultural waste / sugar and grain
- Hazardous waste transfer
- Pneumatic Excavation.
